M. D. Kneehill Hold Organization Meeting

The Council of the Municipal District of Kneehill No. 40 held its organization meeting on April 10 and 11. The meeting lasted for two days and a long program of business completed. M. D. Kneehill was elected reeve for 1946 and M. Schmalz deputy reeve. The following employees were appointed, A. J. Purvis, Home and the council voted to Secretary Treasurer; C. J. Christie and C. G. King, assistants; J. G. Omorite, field supervisor. A delegation representing the Drumheller Municipal Hospital District interviewed the council regarding a proposed Old Folks participate on the scheme. The Court of Revision on the general assessment will be held on July 2nd and 3rd. A petition asking for a plebiscite on a municipal hospital district in the territory adjacent to Acme was given consideration. It was decided to hold the regular meeting on April 24th at 10 a.m. against a railway concession. The council also discussed the China to Russia, a conference in the hamlet of Hills.

It was decided to operate two awarded to Thos. Scott, Three road camps, same as last year and the employees were chosen. For the north camp, Wm. How-ell (foreman), T. H. Markle, Floyd Johnson, Victor Greal, Edward C. Jensen and Philip Will; South camp, H. J. Gimbel (foreman), John Esau, Wilmer Teitz, Joseph Holwegner, E. R. Gordon and Chas. Trumbley. A. E. Staitte, Paul Elvin and Ernest Wilson were engaged as operators of the motor grader machines.

The budget for the year was passed and the following rates of taxation authorized,

Mills
Municipal Rate
Social Service
Olds School Division
Drumheller School Div.
Stettler School Division
Red Deer School Div.
Wheatland School Div.
Beiseker School District
Acme School District
Hamlet of Swallow
Trochu Pontmain S.D.
Trochu Valley S.D.
Carbon School District
Elnora School District
Drumheller Hospital Dist.
Three Hills Hosp. Dist.
Olds Hospital Dist.

The council approved the granting of licenses to a wholesale fuel business at Bircham, and a coffee counter at Swallow.

BEWARE OF FIRE

At this season grass, weeds and brush are dry and inflammable. Danger from fire is greatly intensified. Therefore be extra careful.

When you dispose of not ashes be extra careful they are safe from contact with any inflammable material. Do not put hot ashes out at night or in a high wind.

Be extra careful that matches are put out of reach of children. Many grass fires are started each year through children playing with matches.

By all means burn off the dry grass around your place. But get help. Many grass fires get out of control each year through lack of sufficient help.

TUDOR

Mr. and Mrs. Mike Powchuk have taken up residence at the home of J. Young, section foreman in Tudor.

Mrs. Agnes Busman of Uniontown, Washington, is visiting Mr. and Mrs. Paul Busman.

Earl McIntosh of Chilliwack, B.C., has taken a position with Otto Holscher on the farm.

Mr. Dees, superintendent of the U.G.G., visited Mr. and Mrs. W. B. Horton recently.

That Mrs. Harry Clemons shows that the Western Star in their desire to Wednesday are applying their pleasant and very pleasant.

Five army trucks arrived in Tudor last week and are being assembled at Hendry Motors.

Students Hold Successful Dance

The student's dance last Friday was quite successful. Following is the financial statement.

Receipts
Sale of tickets
Receipts at door
Sale of lunch
Lambert (re coffee)

Expenditures
Hughes' Orchestra
Scout Hall
Farmers Exchange
Shaw's Drug Store
Builders Hardware
Tax

The Students' Union wish to express appreciation to all who contributed to make the dance the last of the season, a success.

The decorations put up by Union were supplemented by the handiwork of the pupils in the lower rooms and formed the activity portion of their Easter and spring enterprise work. As such it is necessary that it be returned to the school for the children's notebooks and display. The streamers have been left for use by the W.A. and Carbon Branch of the Canadian Legion.

The social life of the school has been limited this year to four events. A dance in November, the Christmas concert, a bridge and whist drive and the dance last Friday.

Wedding

The I. L. Peretz Institute, Calgary, was the scene of a pretty wedding on Sunday, April 7th, when Alice, younger daughter of Mr. and Mrs. S. Ostrovski, Calgary, became the bride of Morris Switzer, son of Mr. and Mrs. Chas. Switzer, also of Calgary.

The bride, a former member of the Col. Gunn Nursing Division No. 60, looked charming in a floor length gown of egg shell satin. She carried a sheath of Calla Lillies.

Over 150 guests attended the wedding and dinner.

Mr. and Mrs. Switzer spent a couple of days at Banff before returning to Carbon where the groom operates a goods

Visual Aids In the Church

Buffeted by the years of war fare, shaped and moulded to a modern approach and understanding of the needs of today's society, the Church, built upon the unchanging and indestructible truth of life is banding its people together for the great task of building a lasting peace.

The Anglican Advance Appeal for Rededication and Thank-Offering makes manifest the part that the Church of England in Canada is taking in a world movement of all Christian communities in laying the foundation for a permanent understanding between all peoples and the development of a better way of life.

A strip film entitled "A Mighty Fortress" will shortly be released across the Dominion. It covers dramatically the growing need and development of a spirit of co-ordination among all people of good will. Through the growth of a savage ideology of blood and strife, the destruction of the cities of the old world, whole nations broken in spirit and filled with fear, is shown the work of the Church during the war years and the epic task that awaits it in the future. This film has been beautifully handled and the recorded narration with musical background builds a great atmosphere of realism throughout its presentation. It is indicative of the broad vision of the church that the modern handling of such visual aids shows in its increasingly successful effort to come into the every day life of its people.

LITTLE ITEMS OF LOCAL INTEREST

The W.A. will hold a tea in the Scout hall, Saturday, April 20th.

All stores in Carbon will be closed on Good Friday and Easter Monday.

The A.Y.P.A. will sponsor a whist drive in the basement of the Anglican Church on April 24

After spending the past 23 years in the dry goods business in Carbon, Mr. I. Guttman left on Monday to make his home in Calgary.

Mr. A. McLeod was a business visitor to Calgary Monday.

Born, to Mr. and Mrs. Norman Nash, a son, Friday, April 12th.

Born, to Mr. and Mrs. Ben Fox, a daughter, Saturday, April 13th.

There will be a service in Christ Church, Carbon, Sunday April 21st at 10 am, Rev. C. J. Brown in charge.

Book your best in a Rac perment. Mr. Rac will be at the Hotel on Friday, April 26th. Make your appointment with Vi Pattison.

Bob Shaw, who has been confined to his bed for the past ten days, was taken to hospital in Calgary on Monday.

Mr. and Mrs. L. Poxon and "Dusty" were Calgary visitors this week.

Understand there is a couple in Carbon who have a slightly used bed for sale. Minus one slat.

An impressive Sunrise Service (7 o'clock) was held in the United Church on Palm Sunday.

The entire service was conducted by members of the Young People's Union which attended in full force.

Following the service breakfast was served all present in the Church annex.

CARBON SPORTS, MAY 24th

Eight Team Baseball League Formed

About 40 representatives from eight neighboring towns gathered in the Village Office, Carbon, last Wednesday evening and organized the Kneehill Baseball League Teams in the league are Trochu, Sunnyside, Three Hills, Ghost Pine, Swallow, Beiseker, Irricana and Carbon.

It was decided to run the league in two sections, north and south, with a playoff after the schedule is completed.

Officers elected were, President, Lamle, Swallow; secretary, J. Hanna, Trochu; board of governors, Lamle, Swallow; Hanna, Trochu; Velker, Beiseker; Wise, Irricana; Lawrence, Three Hills; deFrece, Ghost Pine and Wallace, Carbon.

SPECIAL EASTER SERVICE IN UNITED CHURCH

The Easter Festival will be observed in Carbon United Church on Sunday morning.

The pastor will bring an Easter message and appropriate music will be rendered by the choir.

There will be a reception for new members followed by the Sacrament of the Lord's Supper.

The league will open on May 26th. Complete schedule will be published next week.

Forestation In The West

CANADA'S FORESTS CONSTITUTE one of her most valuable natural resources and are the basis for her largest industry, the production of pulp and paper. Forested areas in the Dominion are estimated to be some 1,220,400 square miles, or about thirty-five per cent. of the total land area. Within the boundaries of the nine provinces, there are 1,160,405 square miles of forest. This figure represents fifty-eight per cent. of the total land area of the provinces. These forests are valuable not only for their commercial and domestic uses, including the production of pulp and paper, lumber and fuel, but they play an important part in soil and water conservation, and in providing a habitat for fur-bearing and game animals. The greater part of the forest areas are located in the Eastern Provinces and in British Columbia. Statistics show that there are 168,752 million cubic feet of standing timber in the five Eastern Provinces, 45,828 in British Columbia, and only 24,577 in the three Prairie Provinces.

Would Help To Solve Problems

It has long been known that the planting of trees in the farming districts of the West would help to solve problems associated with soil and moisture conservation and wind damage. In a number of districts extensive programmes of tree and shrub planting have been undertaken, usually with very satisfactory results, and Dominion Forestry Stations at various points in the Prairie Provinces have played a very important part in encouraging and promoting this work. The planting of trees and shrubs has also been included in the work of the P.F.R.A. in Saskatchewan. Recently, briefs were presented to the Saskatchewan Forestry Commission at Saskatoon by interested individuals and organizations, and these contained information concerning the value of this work in Prairie farming districts.

Value Shown By Experience

It was pointed out that there is a shortage of men trained to deal with problems relating to tree culture and that there is a real need for the setting up of a school of forestry in one of the Western Universities. There is likewise need for increased facilities for research in cultural practices, disease control, soil, and other subjects connected with the growing of trees. Experience has shown that trees can be successfully grown on the Prairies, and that they are of considerable value in holding snow cover, for reducing soil drifting and weed dissemination, as wind-breaks, and conservation of moisture. In addition they add much to the appearance of any farm or community. In some parts of the West trees have been planted along the highways with very satisfactory results, and it has been suggested that this practice should be more widely followed. It is to be hoped that those who are giving their interest and encouragement to this work will meet with success in their undertaking.

Advance In Surgery

Doctors Able To Use Electric Knife In Chest Operations

A combination of anaesthetics which for the first time permits surgeons to use the electric knife in chest operations was announced by Dr. Phyllis Harroun and Dr. F. E. Beckert of the University of California Medical School.

The combination consists of nitrous oxide or laughing gas commonly used in tooth extractions, and curare, a powerful poison originally utilized by South American Indians to make their arrow-tips more deadly.

Reporting in Anaesthesia, a medical journal, Dr. Harroun and Dr. Beckert explained that the laughing gas puts the patient to sleep and the curare paralyzes the breathing muscles, which must be immobilized during chest surgery.

Even more important, neither curare nor nitrous oxide are explosive. That eliminates the danger that the tiny sparks from the electric knife will cause an explosion in the lungs of the patient.

SHRUNK TO FIT

In the early days of flying, "dope" used to paint the fabric of planes was difficult to obtain, so many ships were heavily coated with glue. When this was nearly dry, an alum and water solution was applied, shrinking the fabric tightly on the ribs.

Price Control And Rationing Information

Q.—Could you please tell me how much sugar is required to supply all the provinces in Canada when a coupon is declared valid?

A.—When one coupon is declared valid for the purchase of sugar, twelve million pounds of sugar are needed to meet the demands of all coupon holders in Canada.

Q.—I understand a price has been fixed on the sale of dressed poultry direct to restaurants. Can you tell me how to arrive at this price?

A.—All persons who sell dressed poultry direct to public eating places may charge on these sales a maximum of two cents per pound above the wholesale ceiling price.

Q.—I would like a price list of maple sugar and maple syrup. Could you supply me with these prices?

A.—Here are prices of maple syrup: Canada Fancy Grade \$3.40 per gallon; Canada Light Grade \$3.15 per gallon; Canada Medium Grade \$2.90 per gallon; Canada Dark Grade \$2.65 per gallon; Ungraded \$2.40 per gallon. These prices are the ceiling on sales between the producer and the consumer and are less transportation charges from the producer to your address. This means if there is any transportation charge, such as freight or express, you have to pay it. Ceiling price for "farmer's run" bulk maple sugar is 22 cents per pound. Ceiling price on one-half, one, two or three pound blocks is 35 cents per pound.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Unrest Unnecessary

If Nations Of The World Would Stop Bluffing

Unrest in the world today can be attributed to international bluffing. Rear Admiral H. C. Rawlings of the Royal Navy told the annual reunion of the Toronto branch of the Naval Officers Association.

Rear Admiral Rawlings, commodore of Atlantic convoys for two years of the last war, declared: "With a strong America and a strong British Empire, if we are going to have a show-down let's have it now. If North America and the British Empire have faith in each other's purposes, hope in each other's future and charity to each other's shortcomings, then they can go forward into the future in dignity, freedom and peace."

Admiral Rawlings paid glowing tribute to the men of the Canadian Navy who guarded the lifelines to Britain. "If the RCN and the RN stick together in the future as they have done in the past, I don't think we'll have anything to worry about," he said.

WOULD BE LIMIT

They were discussing a certain undefeatable and irrepressible politician.

"Well," summed up the smokeroom philosopher, "I'll tell you this about him. He might have typhoid and recover; he might have pneumonia and recover; he might have cerebral meningitis and recover; he might have yellow fever and recover; but—if he ever had lockjaw, by gad, sir, he'd burst."

Situation Appalling

Thousands Of Children All Over Europe Suffer From Tuberculosis

Conditions among European children were described as "nothing short of appalling" by Dr. George Thelin, general secretary of the Save The Children International Union, Geneva, on his arrival in Ottawa.

In some parts of Poland, he said, "80 out of every 100 children are suffering from tuberculosis," while 40 per cent. of children in France, Belgium and Holland were infected.

Conditions were progressively worse as one travelled eastward across Europe with children suffering with tuberculosis, rickets and extreme malnutrition.

GEMS OF THOUGHT

CHARACTER

Character is that which reveals moral purpose, exposing the class of things a man chooses or avoids.—Aristotle.

The force of one's being, if it has any force, must come from within.—R. W. Clark.

The precept, "Know yourself", was not solely intended to obviate the pride of mankind; but likewise that we might understand our worth.—Cicero.

Real character is not outward conduct, but quality of thinking.—H. Wood.

Truth comes from a deep sincerity that must always characterize heroic hearts; it is the better side of man's nature developing itself.—Mary Baker Eddy.

Of all exercises there are none of so much importance, or so immediately our concern, as those which let us into the knowledge of our own nature.—Bishop Warburton.

Gas-turbine planes are not so fast as the jet plane, but have a better range.

MORE LINEN SOON

A big increase of linen exports to the United States and Canada is expected to follow the government's release of 3,500,000 yards of airplane linen worth £1,000,000 (\$4,500,000) to Northern Ireland manufacturers. All the allocation is to be devoted to the export trade.

A waterproof plastic clothes line that will not rust, corrode or rot has been invented.

Chinese City Of Mukden Has Been A Hub Of History For Nearly One Thousand Years

MUKDEN, to which eyes often have been turned and may be turned again, has for nearly 1,000 years been a hub of history. Those who credit transportation with the greatest share in influencing the lives of people may appropriately point out that history turned about it because it was a centre of communication, for centuries by river and beasts of burden; recently, as its span of life is measured, by rail and highway. In all that time it has tempted those ambitious to control, at their hands has alternately suffered and prospered, writes Richard T. F. Harding, in the Cleveland Plain Dealer.

It is described in a bulletin of the National Geographic Society as overlooking the chief corridor that joins far northeast China and the great North Plains region. That corridor, which follows the valley of the River Liao, leads to a narrow coastal gateway that has gained more notice in war than in commerce. It has been chosen repeatedly as a route for invasion, but by no means always proved easy. The rugged coast in which it is a break has helped make it as easy to defend as it has seemed inviting to attack. Some have called it China's Thermopylae. But to modern warfare it is as vulnerable as Greece.

This century had barely begun when Mukden's value drew the Russians and Japanese into a struggle for its possession. In that war, fought in 1904-05, the Japanese took the city from the Russians after a long struggle, a victory that gave them a valuable transportation advantage. It might be held that in a specific sense that war was fought for possession of the city. It was forceful expression of the Japanese protest against a railway concession granted by China to Russia, a concession that made Mukden more certain than ever the key to its region, therefore of increased importance in the continually growing Russian threat against Japan.

For nearly a generation Mukden was at peace, so far as the world's headlines indicated. Then, in 1931, it suddenly reappeared in public interest when the Japanese made it the scene of the incident that opened their long war against China. Some observers, including a few true statesmen, recognized that scene for what it was—the beginning of trouble in the East, trouble that would be serious if not stopped at once. But the peaceful world preferred a big trouble to a small one, so did nothing and finally got what it asked, as it will do again.

For a time during the Japanese occupation of Manchuria, Mukden had at least a superficial prosperity. Between 1936 and 1940 its population doubled to pass 1,000,000, a growth traceable chiefly to the five railroads that made the city a natural centre of industry. Coal and iron, soy beans, chemicals, grains, cement, sugar beets, hides and leather made up most of its trade.

The old city, within a high wall, contains the ancient imperial palaces and government buildings of China. The new part is modern western, built by the Japanese on generally American lines. The railway station and its brightly-lighted approaches show an intent to copy a bit of Washington—a pre-Pearl Harbor idea.

The glories of the old city date back to the 1600s and before, when the Manchus, having gained the upper hand in China, made it their capital. It lost its imperial dignity in 1644 when the Manchus moved their headquarters to Peking, where they took over the seat of the Ming dynasty. But it still has many of its ancient royal associations, including the tombs of Manchu emperors who ruled from its palaces.

Long before the Manchus' day the Tartars, the Golden Horde that swept down from northern Manchuria, had made the city one of their capitals. That was as early as the 1100s, when it was as important in transportation by horse as it ever has been.

NOTHING TO IT

"It's surprising," said the professor to his wife at breakfast, "to think how ignorant we all are. Nearly every man is a specialist in his own particular line, and in consequence we are all as narrow-minded as it is possible to be."

"Yes, dear," said his wife.

"I, for instance," he continued, "am ashamed of my failure to keep abreast of modern science. Take electric light, for example, I haven't the least idea how it works."

His wife gave him a patronizing look, and smiled.

"Why, Herbert, I'm ashamed of you, too. It's simple! You just press a switch, that's all!"

Mean Business

Many Returned Men Are Sticking To University Courses

When young veterans enrolled in university courses after their discharge from the forces there were many who forecast their early departure from the university. It was said that the veterans would not "stick it out," that they were just putting in time, and that they would find it so hard adjusting themselves to civilian life that they would soon move away from academic fields. The first important denial of that theory has been shown at Ajax, annex of the University of Toronto School of Practical Science. Here, 1,412 students were registered. More than 80 per cent. of those students are veterans, with three to five years' service in the armed forces since they last took classes at school. Of that total only five have dropped out, and those five are taking rehabilitation tuition in Toronto to refresh themselves in their preliminary studies. That is a most remarkable record. It shows that the veterans are earnest in their desire to study, that they are applying themselves, and that they mean the most serious kind of business.—Globe and Mail Toronto.

Thought About Man

Late President Wilson Careful To Avoid Trouble For Soldier

While President Wilson was visiting France, General Pershing conducted him through an Army post. The General took one of the equipment bags of the men, which had been laid aside in camp, and spread out the contents so that the President could see how well the needs of the men were provided for. As they turned to leave, the President said with a smile: "General, as your commander in chief, I order you to replace this equipment in the pack and leave it as we found it, for if we do not, this man's commanding officer will find it in disorder on his inspection and the soldier may suffer in consequence." General Pershing cheerfully obeyed.

OPENS NEW STORK DERBY

Thomas Foster, former mayor of Toronto, Ont., whose \$1,168,555 will has been probated. The will bequeathed a trust fund of \$600,000 to the University of Toronto to be used in cancer research work. Under terms of the will a \$10,000 fund is to be set aside for a stork derby in Toronto, Ont. The interest will provide \$2,500 at the end of each of four separate 10-year periods. It goes to the winners. The first of the four 10-year-race periods is already under way. It started on the date of "Honest Tom's" death—Dec. 11, 1945. The second period starts three years from Dec. 11, 1948; the third, six years hence and the fourth, nine years hence. Contesting mothers must have resided in Toronto for a year prior to the start of the race and keep on living in the city for duration of the race.

Australia Objects

Wants To Keep Control Over Bases Within Her Jurisdiction

Premier Chifley said that Australia was standing firmly against the United States' demand for control over bases within Australian jurisdiction.

"We are not going to deal with the question piecemeal," he said. "It should be dealt with in the first place, as far as Australia is concerned, in London."

Dr. Herbert V. Evatt, Australian Minister for External Affairs, in the House of Representatives said.

"Australia believes the question of Pacific island bases and their mutual use is one to be considered first by the forthcoming conference of Dominion Prime Ministers" in London.

He added that for this reason Australia was not represented at the talks in Washington in connection with the disposal of 25 military and civil air bases. These talks were not on a ministerial level.

If a person learned the names of 25 new insects each day, it would take him more than 60 years to memorize all those which scientists have described and catalogued.

After Historic Service In Two Wars British Battleship Warspite Is To Be Scrapped

"APPROVED for H.M.S. Warspite to be scrapped." With these formal words in an official order the Admiralty signed the death-warrant of the 30,600-ton battleship Warspite, grand old lady of the Royal Navy, after historic service which began at the battle of Jutland in 1916 and ended with the bombardment of Walcheren, Holland, in support of the landings on that island in 1944.

Jutland was nearly her death bed. To this day, despite a £3,000,000 (\$13,500,000) refit between wars, scars faintly show where she was struck by 11 big German shells and 20 smaller during that battle. Hits by enemy shells jammed her steering gear and set her steaming in a wide circle towards the coast. All enemy guns were trained on her when she suddenly answered her helm again—and gear righted, it was thought, by the explosion of another shell.

Built originally at a cost of £2,500,000 (\$11,250,000) the Warspite entered the Second Great War, after her extensive reconstruction, one of the most powerful battleships in the world. Sent from Alexandria to Halifax in December, 1939, to escort the first contingent of Canadian troops to Britain, she left the convoy in mid-Atlantic for an abortive chase after the German pocket battleship Deutschland which preferred to evade action.

At Narvik, Norway, in April, 1940, Warspite and her brood of destroyers forced their way into the fjord and wrought havoc among German craft. A week later Warspite went back to Narvik and battered the shore with her guns once more.

By May 1940 Warspite was back in the Mediterranean as the Commander-in-Chief's flagship. After bombarding Fort Capuzzo on the North African coast she poured 94 tons of shell into Vellona, Albanian port.

She took part in the battle of Cape Matapan early in 1941, a major defeat for the Italian Navy.

In the battle of Crete in 1941 climax of the Warspite's work in the Mediterranean, more than 400 bombs were aimed at her by Nazi airmen. She dodged all but the last which caused some damage on the port side.

After this engagement Warspite went to Bremerton Navy yard, near Seattle, for permanent repairs.

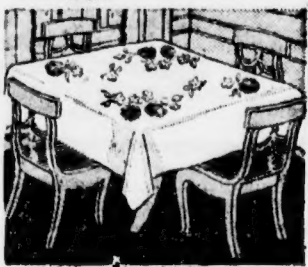

Then she crossed the Pacific to Australia and on to Colombo, Ceylon, to join the Eastern Fleet and make war against the Japanese until recalled to the Mediterranean.

Warspite played a big part in the Salerno campaign after the surrender of Italy. With H.M.S. Valiant she bombarded Salerno and of 62 rounds from her 15 inch guns fired at long

range 35 fell exactly on target and eight within 100 yards.

Back in home waters in 1944, on D-Day the veteran ship bombarded the Normandy beaches in preparation for the first landings. In August she bombarded German-held Brest and in November gave valuable support to the British landings in Walcheren.

Needlework For All

7122

by Alice Brooks

Rosy apples and bright blossoms, done mainly in 5-to-the inch cross-stitch, perk up your table linens. It's really jiffy embroidery! Needlework that colors varied linens is worth-while stitchery. Pattern 7122 has transfer of eight motifs 3½ x 4 to 10½ x 12 inches. To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

Good For Morale

Putting On Dress Clothes Gives A Person Million Dollar Feeling

A writer in The Scene, a monthly paper published at Shingwauk Farm, Muskoka, remarks that "one of the worst horrors of peace has returned—dress clothes, banished in wartime as an impediment to victory, are back to hamper happiness."

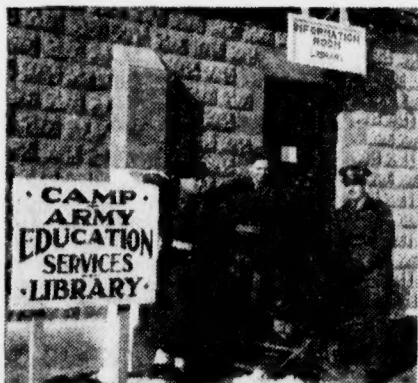

We do not agree that dress clothes are one of the horrors of peace. True, they sometimes occasion trouble with a recalcitrant stiff shirt, a tight buttonhole, or a tie that persists in going askew for the evening to a dinner or a dance, nothing spruces him up so much and lifts his morale as to put on dress clothes. It gives him a nice, clean-cut refreshing aspect that raises his spirits, stimulates his conversational powers, and gives him that million dollar feeling that not even a new business suit can confer. It is a sure remedy for the blues.

There are English civil servants administering remote areas, far from the nearest white man and still further from what they would call civilization, who dine in solitary state with a black man waiting upon them, and who only retain their sanity by putting on a "tux" for dinner in the evening, because it represents to them a visible link with the outside world and home.—St. Thomas Times-Journal.

SHOULD KNOW CANADA

Dean J. B. Edmonson, head of the school of education at the University of Michigan in Ann Arbor, said in an interview that it was "highly desirable" that United States residents become better acquainted with Canadian history and geography.

Some butterflies' wings are shingled with more than a million scales.

ARMY EDUCATION SERVICES—Busiest department at army camps these days as soldiers prepare to return to civilian life is the Army Education Services. Soldiers have plenty of opportunity to gather useful technical knowledge and improve their education while waiting discharge. Pictured here are some of the activities at Dundurn Camp. Upper left—Standing before the camp education office, which also houses a well-stocked library, are Capt. C. A. Hopkins (right) Toronto and Saskatoon, camp education officer, and his assistants, Lieut. A. M. Macaulay, Vancouver (centre) and Lieut. Doug. Minor, Regina.

Upper right—From a picture on a calendar this model house was being built. Left is Pte. W. Roberts, Dawson Creek, B.C., and right, Cpl. W. B. Olson, Camrose, Alta., instructor.

Lower left—A class of soldiers taking correspondence courses in various subjects. Some will go on to University.

Lower right—Pte. Haroldur Skafel, left, Ratner, gets assistance on a correspondence course in bookkeeping from Staff-Sgt. Charles F. Scott, Regina and Calgary.

THE WORLD OF WHEAT

The Need for More Wheat

Evidence continues to pour in from people on the spot in Europe and Asia of the tragic situation that millions will find themselves in from the lack of food in the next few months. Every farmer who feels, therefore, that he can reasonably well spare even a load of wheat from his bins will certainly be performing a most humanitarian act by hauling it to market so that it can be shipped quickly abroad.

But the need will not end in August. Much wheat-man's finest food will be required during the winter of 1946 and the spring and summer of 1947! Farmers therefore whose fields now have good reserves of moisture, and who feel they could sow additional land to wheat this coming spring would certainly be helping to alleviate the acute distress from hunger and disease that will still prevail in Europe and Asia at least for 18 months to come. The Dominion government so far has not asked farmers to sow any additional wheat acreage, so that the matter is left to each individual to do what he feels best considering all the circumstances. We must remember that these starving people in Europe and Asia are our past and we hope future, customers for our prairie products.

Filmstrips have proved to be one of the most useful media for study in schools, because they can be adapted to suit the particular needs of any class.

HONEY PRICES ARE INCREASED

To help meet higher beekeeping costs resulting from cancellation of the subsidy on imported packaged bees, the Price Board has announced an adjustment of one cent per pound in the wholesale ceiling prices of honey. The new schedule, now effective, will mean an adjustment of from one to one and one half cents per pound in the retail ceiling prices of honey.

In line with its policy of removing subsidies wherever possible the Board recently cancelled the subsidy of fifty cents a pound paid during 1943 and 1944 on packaged bees imported from the United States.

BUTTER WITHOUT COUPONS COSTS \$1000

Jersey Farms Limited, Vancouver was fined \$1000 in Vancouver police court for delivering butter without collecting coupons at the time of delivery. The firm pleaded guilty. Prosecution stated that the firm was short 11,416 butter coupons.

THEATRE FINED

The State Theatre, East Hastings Street, Vancouver, was fined \$100 for charging admission prices in excess of Prices Board schedules. A few weeks ago this theatre was fined \$250 for a similar offense. Magistrate W. B. McInnes warned that further disobedience of the Board's orders would result in heavier penalties.

A drip is someone who won't give to the last drop.

Do It Yourself

Any day now you'll be feeling that urge to change the furniture around. A little fresh paint here and there—perhaps a table touched up gaily with gleaming enamel.

Maybe you will be conserving your clothing and fabrics by making new clothes from old—chances are your needles and scissors will be busy. It's fun to sew—economical, too.

Do you find it difficult to keep your small fry playing happily indoors? Then make them some of these washable stuffed toys from old scraps of fabric or old cloth.

You'll find a world of inspiration for Spring fever in your EATON'S Catalogue. There you will find paints, fabrics, patterns and a thousand and one new ideas for the thrifty-minded.

T. EATON & CO. LIMITED

EATON'S

DANGER AHEAD

The good work done in Alberta in the control of bacterial ring rot in potatoes is in danger of a serious set-back and the Alberta department of agriculture is urging all who grow potatoes to help them keep this destructive disease at bay. The matter has been greatly complicated by the introduction into the province during the past winter of large quantities of table potatoes from the United States. It cannot be too strongly stressed that these potatoes are strictly table potatoes and were brought in to relieve the shortage due to poor crops last year. Many of these imported potatoes are known to be infested with serious diseases including the most serious of them all, ring rot. On no account be persuaded to use these American table potatoes for seed. Those who have not had experience with the disastrous effects of ring rot may be inclined to treat this warning lightly and, in planting such potatoes, just for their own use may start new spots of infestation throughout the province.

Make sure your seed is good. If you have not sufficient of your own, try to obtain it from a neighbor whose crop is known to be free from disease. Don't use for seed any potatoes purchased from your local store unless they bear the Dominion tag certificate showing that they are of seed quality.

The planting of ring rot infested potatoes will mean not only loss of time, labor and crop but is on a par with the carelessly thrown match that starts the forest fire. Results are rapid and may be equally disastrous.

Many prairie farmers who grow flax consistently claim it is their most profitable crop over a long term of years. Careful planning and good cultural practices they say, can take the risk out of flax growing.

Flax straw, once a problem when the crop was combined, now can be turned into an asset in some parts of the west. Better manufacturers are paying eight to eleven dollars a ton for the straw.

The Wounded Come Home

There is an old tradition
among sea-faring men that a
ship has a soul.

A sailor will speak with af-
fection of the ship he rides.
Songs and stories are legion
about the love of men for their
ships.

If this is so, the Lady Nelson
must have a beautiful spirit.
She has been used as a hospital
ship for so long that her very
name calls up pictures of wound-
ed men coming home. She has
recently made her 60th crossing
of the Atlantic as a mercy ship.

Talking to an officer who
served on a few of her trips we
found that all the bread con-
sumed on her many voyages is
baked aboard ship. There are
two bakers who turn out the
nearest to home made bread
you could ever find, besides
hundreds of dozen buns. Inci-
dentally they bake about 700
loaves a day which is a lot of
dough in any language.

He remarked laughingly, 'you
ought to see the boys go for it,
its the first real white bread
they've seen in many moons.'

To Chief Steward Buckles
goes the honor of providing for
the returning men. He says
"when you serve a nice brown
pork chop, mashed potatoes,
vegetables with a couple of slice
of fresh bread, topped off with
ice cream, the eyes of the boys
are lovely to see."

Butter is rationed only to the
extent that there is no waste.
Each one receives a fair sized
pat, bed patients are allowed
slightly more.

On a recent trip when they
served fifty thousand meals,
they were still using fresh milk
that they had taken on at Hal-
ifax when outward bound.

The Lady Nelson has huge re-
frigerators and milk is kept at
a much lower temperature than
you would use in a home. The
cream is skimmed off from day
to day and given to the ulcer
patients, the remaining milk is
given to the boys to drink. All
provisions are taken on at Hal-
ifax with the exception of orange
and other fresh fruits that are
sometimes taken on at Algiers
for the return trip.

There are four diet kitchens
for the wards. On her last trip
she carried 300 bed patients and
this is a fair average. The walk-
ing wounded eat in the main
dining room.

Practically every known drug
is used, over 300 standard med-
icines, exclusive of tablets. Of
these, there are 125 different
kinds from a sugar coated pill
to aspirin, and a mepacrine for
malaria. There are over 5000
items on the drug list alone.

Most medicines contain sugar
from the cough mixture with its
extra heavy percentage, to sal-
ines for intra-venous feeding.

Cotton plays a big part on hos-
pital ships. There are miles of
bandages, crinilines, plaster of
Paris gauze, flannelete, huge
supplies of absorbent cotton.

The Lady Nelson uses over
500 sheets a day and 500 pil-
low cases. As a trip runs 8 to
10 days you get some idea of
the number of sheets required
for one trip, which is approxi-
mately 500 sheets and 5000 pil-
low cases, with extras of course.

Most of the men sleep on
cots, two to a tier, the more se-
rious cases have small beds at-
tached to the floor.

Over 2000 blankets are in use.
These are changed every trip.
Not only washed but sterilized.

Development of rust and
wilt resistant varieties has help-
ed farmers overcome the worst
hazards of flax raising; and as
a result many western farmers
now look upon flax as a reliable
and profitable crop.

In a free country, griping
may be one of our rights but it's
still wrong.

FROM THE EDITOR'S DESK

TOWN KILLERS

The resident of a town and
district who always has an
idea that he can do better some
other place is generally the one
who is last out of bed in the
morning. It has often been
heard said that this that and
the other thing is killing the
town, yet in ninety-nine cases
out of a hundred it is the town
people themselves that kill a
town. If the people of a town
work together for the general
good, it will take a powerful
combination of outside circum-
stances to keep it back on its
march down the road of pro-
gress. The town killers are the
town people, and the ones who
should have the immediate

charge of first degree murder
laid against them are those who
go out of town to make their
purchases; then in order of
names the following—and in no
case should the charge be re-
duced—those who oppose im-
provements; those who imagine
they own the town; those who
prefer a quiet town to one of
hustle and push; those who op-
pose every movement which
does not originate with them;
those who never have a good
word to say of the place but
snarl at every movement and
speak disparagingly of it to
strangers; those who neglect to
boost their home town paper,
which is a reflex of the town.

Co-operation - -

Keynote of Success

It is generally conceded that
best results in any undertaking
are obtained by co-operative en-
deavor. Unfortunately most of
us would prefer that such co-
operation involved no effort.
There are times, however, when
the benefits to be gained are
worth any effort, for example,
when we, ourselves, profit.

The Carbon Community Club
are planning a program of im-
provements in our town and are
asking for the co-operation of
every citizen in putting it into
effect.

The Chronicle feels that this

is an opportunity for betterment
which should not be allowed to
pass. Anything benefits the
community, benefits the indi-
vidual. In co-operating with the
Community Club we are not
giving something for nothing.
We all shall profit.

Nothing is accomplished af-
ter a project is done, so any crit-
icism then is unfair and not
wanted.

The need for your assistance
as property owners can be seen
easily. You should understand
the problems at your own door.
Let us all share in the blame
and credit alike.

Excursion Fares Again

Reduced railway fares for
Easter between stations in Can-
ada will be in effect from April
18th to midnight April 23 in the
first low holiday rate since gov-
ernment restrictions were lift-
ed it was announced today by
Mr. Williamson, local agent of
the Canadian Pacific Railway.
Special bargain fares for teach-
ers and students will also be
available, but for a longer pe-
riod.

These first low holiday fares,
since the order three years ago
prohibiting such reduced rate
transportation to free the rail-
ways for military traffic, will be
based on one and one quarter
single fare for a round trip tick-
et. The tickets are good going

p.m. on Easter Monday, April
22, while they will be honored
for the return journey up to mid-
night of Tuesday April 23.

On branch lines where there
is no train service on April 18,
tickets will be sold to com-
mence journey on April 17th.
Similarly the return limit will
be extended to make it "good
on first available train" in
cases where there is no train
service on April 23.

The special Easter tickets
for teachers and students will
be available upon presentation
of the usual certificate from
Friday, April 5 to April 23 go-
ing with midnight of May 7 the
deadline for return.

WORLD HAPPENINGS
BRIEFLY TOLD

Jet propelled airliners, designed to cross the Atlantic in five hours at an altitude of 40,000 feet, are being built in Britain.

Switzerland and Russia have re-established diplomatic relations after a 22-year-long break, the Swiss political department said.

Senator A. D. McRae of Vancouver predicts that before long the price of gold will be increased beyond the present \$35 an ounce.

A six-foot plaster cast of the Venus de Milo was auctioned in London for £2 (\$9) at a sale of art treasures belonging to the late Lady Milchet.

Three British sergeant-majors were among more than 1,000 applicants for a job as announcer in the BBC. One wrote: "I can make my voice heard anywhere."

Dean E. L. Woods of the college of pharmacy at the University of Saskatchewan, has been appointed head of the new department of pharmacy at the University of British Columbia.

A Nazi werewolf movement organizer who instructed Frankfurt youths in sabotage against the Americans, has been arrested and sentenced to seven years in prison by United States authorities.

Astronomers at Mount Wilson observatory have succeeded in measuring the distance to a nebula in the constellation of Bootes, and find it to be 1,200,000,000,000,000,000 miles away.

Maritime Workers Federation officials said the French Colonial Purchasing agency is looking for shipyards in Canada to build steel launches, tug boats and steel barges in pre-fabricated sections.

GARDEN
NOTES

Try Something New

Most of us are too conservative about vegetable and flower varieties. There are many new offerings in today's seed catalogues, vegetables and flowers developed or vastly improved during the war.

For years we have been content to grow a very limited variety—beans, carrots, peas, lettuce and potatoes and corn covering the complete range in too many gardens.

This is a great mistake as scores of vegetables can be grown to perfection anywhere in Canada and, in addition, there are usually several different varieties of each. In recent decades there has been some improvement but the average garden is still limited.

In addition to the standard kinds noted above, there are many others that should be included such as spinach, Swiss chard, peppers, turnips, parsnips, onions, broad beans, kohlrabi, red cabbage, musk and water melons, broccoli, endive, cress, parsley, head lettuce, brussels sprouts, celery, Chinese cabbage, some of the white sweet corns, as well as the bantam, soy beans, etc.

Another point too often overlooked is the introduction of improved varieties. Some of the old standbys of ten years ago are completely overshadowed by earlier, smoother or harder sorts. By choosing carefully from a good Canadian seed catalogue one can create a vegetable garden that will not only have much more variety than was possible a generation ago but one that will yield higher quality and over a much longer period.

Green Stuff

There is such a thing as keeping a garden too trim and neat, say the authorities, that is, pulling out every weed and bit of grass and getting rid of these via the garbage pail or a bonfire. The proper way to dispose of such material is to dig it under, where it rots down and becomes incorporated with the soil, adding plant food and moisture-absorbing humus. Plowing or digging in the spring and turning all such refuse under is the proper method.

This plowing or digging is also important on its own account. Too much emphasis cannot be laid on preliminary cultivation, either in the vegetable or flower garden. It is much easier to destroy weed growth and especially persistent things like twitch grass and sow thistle by cultivating thoroughly before weeds are sown. Much back-breaking labor in weeding can be saved later on and the mechanical condition of the soil will be improved.

First In

Just as soon as the soil is fit for work, one can and should start a few rows of the hardiest vegetables. In this way the garden will pay maximum returns, as with a bit of luck radishes, lettuce, spinach, beets and carrots if sown at the earliest possible moment, will be ready for eating weeks ahead of those planted later.

2666

WAITRESSES SERVING MEALS ON TRAINS—Next time you have breakfast on a Detroit-Grand Rapids-Chicago dining car of the Pere Marquette railway your morning coffee will be brightened with a bright feminine smile and a neat uniformed figure. The waitresses who will serve your meals on this run from now on are the first of 30 girls who have taken over the dining car service. They are among the first to invade a hitherto strictly man's world. The girls like it, and the travellers like it, too. The girls took a 10-day training course practicing dining car technique. Their debut was auspicious. No spilt soup or milk over which to cry.

Here To Stay

Rationing Will Continue Until Food Situation Eases Up

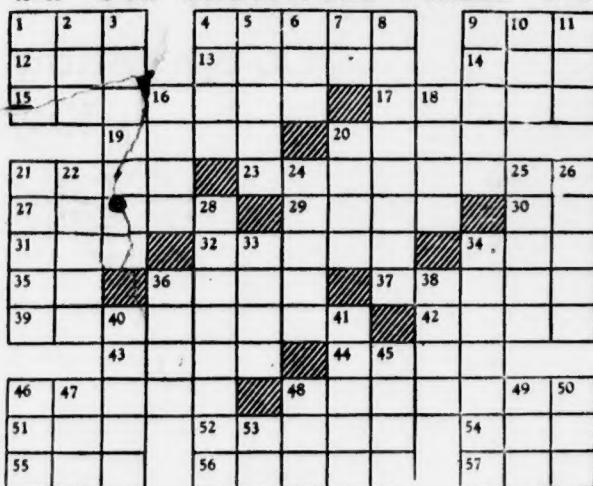

O. R. Rodomar, Montreal, administrator of rationing, prices board, said in an interview at Winnipeg that as long as there is no sign of an easing of the food situation in Europe, rationing in Canada under its present system will remain. He said he expected butter rationing would continue until August, 1947; meat rationing until July, 1947; and sugar rationing until sometime in 1948.

OBEYED INSTRUCTIONS

Mrs. Longsham, giving instructions to her new servant, said: "Before removing the soup plates, Ellen, always ask each person if he or she would like any more."
"Very good, madam!"
The next day, Ellen, respectfully bowing to one of the guests, enquired: "Would the gentleman like some more soup?"
"Yes, please," was the reply.
"Well," said Ellen, "there ain't any left!"

Dr. Lin Yutang, author, has invented an Oriental version of the typewriter.

Run By Duke

Classy Boarding House Is To Be Opened In London

A genuine ducal boarding house is the latest addition to London's none too numerous post-war amenities. The seventh Duke of Leinster proposes to run this establishment at his London house, 89 Hamilton terrace, St. John's Wood. Breakfast will be included in a charge of from eight guineas a week, and the services of a butler, a chauffeur-driven car, and a hairdresser will also be available. There are a dozen bedrooms in the house, and three bathrooms, the Duke's own apartment being on the ground floor facing the street. The house has been empty during the war, but decorators are now busy getting it ready for occupation by the end of this month. The Duke is 52, has been twice married. His is the premier dukedom of Ireland, and he was a lieutenant in the Irish Guards, the Argyll and Sutherland Highlanders, and 8th West Riding Regiment. He served in the First World War, and was wounded in 1917. He succeeded his brother in the title in 1922, and his heir is the Marquis of Kildare.

The oldest sport in America is lacrosse, played by the Indians as far back as the 17th century.

Special Spider-Webs

Are Provided By London Firm For Land Surveying Instruments

One of the few firms in Britain where spiders are welcome guests is that of F. Barker and Son, "Sundial" House, Clerkenwell Road, London. Complying with the necessity for assisting the peoples of many lands to grow more food, this firm is responding to orders for extremely fine instruments needed for immediate land surveying. In order to provide the necessary materials for some of these instruments, spiders' webs have to be spun to measure. Spiders are taken to the firm by a member of the staff and placed in special, long, narrow boxes. These are handled in such a way that the spiders are cajoled to provide webs of the correct strength. Horses' hair is also used in another land surveying instrument that is in great demand. During World War II, this firm has been employed in providing fine military instruments and the workshops at the back of the premises are as busy as they were during the war years.

It is customary to think of sheep with wool and goats with hair, but the bighorn sheep has hair, and the mountain goat has an undercoat of the world's finest wool.

OUR COMPLETE SHORT STORY—

HITLER TAKES A RIDE

By MAURICE ELY HARPER

Copyright
Wheeler Newspaper Syndicate

SUDDENLY I heard a scream. I was out for a walk. I had left my underground castle by the Black Forest of Germany and had thirty guards with me. I really didn't need them for I was perfectly capable of taking care of myself. But they might come in handy.

Hearing the scream, I looked around. The flesh of my guards had unexpectedly disintegrated. I then saw a small space vessel land before me. It was not a rocket ship, but worked on the principle of magnetism from other planets to pull it, and the repelling force of the earth's magnetism.

A rather ghoulish looking man got

out, if you would call it a man. He had a sort of scale in some places instead of skin, he had no hair, and he wore armor over his chest.

Approaching me, he commanded: "Come with me!"

Imagine him ordering me around like that! Me! Adolf Hitler!

"I won't!" I argued.

He answered by paralyzing me with a ray tube.

When I came to I was in a space vessel. It was larger than the one that had landed before me and disintegrated my guards. We were travelling about four Gs. There were quite a few other ghoulish men in the ship. I asked one, the driver who had first spoken to me, where he was taking me.

"We have taken you because we think you can help us conquer the world. You will become our ruler's partner. You will be given the United States and we'll keep the rest," he grinned.

I was amused and disgusted that they were telling me how to conquer the world. But I decided to listen to their plan.

I would allow them to think I would accept only the United States. I could take the rest of the world when the time came.

The ghouls explained, "We will spray this invisible gas, which you saw used on your guards, over the earth. Order your men to go in underground chambers and seal themselves in, so the gas won't hurt them."

It seemed to me quite unnecessary that I should listen to the ghouls telling me how to do it, when I had already thought of the plan a little while before.

I asked, "Where are we going?"

They replied, "We are taking you to the Moomar, where we will manufacture a great amount of gas to use on the earth, then we shall return."

I decided to let them go through with their plans, as less trouble for me. I could get the whole earth without them. My men were few now and I was losing a few battles; of course I would soon remedy that.

We landed at Moomar. Moomar is the moon that goes around Mars. It is similar to the earth's moon except that it has a queer type of vegetation like coral, and has atmosphere.

They took me to their laboratory. It was in a big city. The people there were just like the men in the space vessel.

The laboratory was a long low building. The Moomar man treated me with little respect; I would punish them for it later.

I tripped then, and fell against one of the machines, throwing the switch. My mind went blank.

When I came to I was back in the big space vessel heading for earth. The big guard driver who had escorted me from earth to Moomar grinned and winked at me. He was sitting in the seat beside me. "What has happened?" I asked, finding I was strapped down to the seat.

"In the lab," he answered, "you said it was inhuman, what we are going to do, and you tried to destroy the machines. So we took you prisoner. We need human bodies to make this gas. We will use yours."

I was surprised at such a thing. Why, all of the plan to conquer the world was my idea anyhow! Why should I say it was inhuman? I was disgusted at the idea. Imagine me being so foolish as to say a silly thing like that. I turned to the pilot. "You are crazy!" I told him.

I had worked the strap loose, and now I tried to escape from the space vessel. In my haste I fell out the door.

I suppose then I died. Moomar men could not get my body in time, as it was caught by a passing meteorite and borne away. While I was on Moomar I had wrecked a machine that unloosed the gas on Moomar and so I destroyed the people, my

pilot told me. Only these space vessels escaped. "We have machinery here to make gas," he had said—"We will use your body!" This remark I could not of course allow to pass unchastised. In the space vessel I had seen some machinery which controlled the ship and the ones following it. As I fell out of the door I grabbed the lever and pulled it. Thus I destroyed all the space vessels from Moomar.

I destroyed my foolish allies, the Moomarans, because if I could not take the earth nobody else would.

I write you earth people this because I think you might like to know how close you came to being destroyed. I laugh when I think how my great idea came so close to annihilating you.

I believe it must have been somebody else who said it was inhuman, there in the laboratory. I would never have done such a ridiculous thing.

Sincerely yours,

ADOLF HITLER.

Residence: Deep Region of Hell.

SMILE AWHILE

Seeing an advertisement for a young woman to do light housework, a girl applied for the job.

"I think the sea air will do me good," she wrote, adding, "Will you please say in your reply where the lighthouse is?"

"It's an ideal match."

"What makes you think that?"

"Well, he has money and she knows how to spend it."

"Can you cook?" asked the prospective employer of the demobbed A.T.S. who was seeking a job.

"I'm afraid I can't," answered the girl, cheerfully.

"Understand the care of children?"

"Not a bit."

"Then what can you do?"

"I can assemble a machine-gun."

The pessimist was suffering from rheumatism.

"Every bone in my body aches," he complained.

"You ought to be glad you are not a herring," said the optimist.

Joe: "What's become of the Hikers' Club?"

Jim: "Oh, it disbanded. It was getting too hard to persuade passing motorists to pick us up and give us a lift."

A business agent was recently in the divorce court. The judge, in handing down his decree, addressed these words to the defendant:

"I have decided to give your wife \$50 a month."

That's fine, judge," said the agent, "I'll try and slip her a couple of bucks myself once in a while."

Lady: "You would stand more chance of getting a job if you would shave and make yourself more presentable."

Tramp: "Yes, lady. I found that out years ago."

"Out west we treat the help just like the rest of the family."

"Well, in New York, if we want them to stay, we have to treat them with respect."

Amateur Radio System

Amateurs Are Invited To Get Details Of Recently Announced System

Radio amateurs living in the province of Saskatchewan are invited to communicate with Sqdn. Ldr. D. H. Leitch at 2450 Broder St., Regina, Sask., for details of the Amateur Radio System recently announced by the Minister for Air. Sqdn. Ldr. Leitch has been appointed controller for the Regina area which includes all the province.

It is especially important that amateurs that have had organizing experience get in touch with Sqdn. Ldr. Leitch as it is planned to organize the system to cover the province. This will require the help of qualified amateurs in various parts of the province. Present plans do not include the issue of any equipment except crystals adjusted for the frequency allotted for a particular flight. Technical details will be announced to those amateurs that qualify for membership. Membership requires amateurs to be qualified as required by the Department of Transport but does not involve responsibility or liability for service nor does age, sex or health have any bearing on membership as long as the regulations of the Dept. of Transport for amateur radio operation can be met.

Character Counts

Two Words Formed Foundation Of English Merchant's Fortune

Cut deep in an oak plank on the wall of a London brokerage office were two words which formed the foundation of a great fortune and an illustrious career, the career of the English merchant and reformer, Richard Cobden. When Richard Cobden started out in life his personal fortune consisted of little more than a habit of unceasing industry and a firm, manly integrity. Shortly after he had become the London agent of a large Manchester print mill, he wrote to his employers and asked: "Why do you entrust me with forty thousand pounds of unsecured credit when you know I am not worth a thousand pounds?" To which his employer replied: "Mr. Cobden, we consider the moral risk more than we do the financial one. With us character counts." The next day Cobden hung over his desk an oak plank on which had been carved: "Character Counts!"

Make This Yourself

4832
SIZES
10-16

By ANNE ADAMS

Teen-ager's triumph! Yes, Pattern 4832 is so easy to make that a young beginner herself can do it. AND it's terribly smart, with its adorable front-drawstring neckline.

Pattern 4832 comes in teen-age sizes 10, 12, 14 and 16. Size 12, frock, takes 2½ yards 39-in. fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

Sure Of Direction

Moslem Leader Carries Compass To Indicate Where East Lies

As a precaution against Britain's rainy, cloud-filled skies, the Emir Abdullah of Transjordan carried a compass at his belt when he arrived in London to discuss the treaty which will give his country independence. According to the Daily Mail, which quotes the Emir's secretary, Abdul Munem Rifal, the Moslem leader, carries the compass so that, whether the sun is visible or not, he will always be sure where the east lies. Four times during the flight from Palestine to England, the Emir referred to his compass to turn toward Mecca for his prayers.

Tortured By SINUS PAIN

You can get quick relief from painful distress with a few drops of Vicks Vapo-Rol. It works right where misery is!

KIDNEY ACIDS Rob your Rest..

Many people never seem to get a good night's rest. They turn and toss—blame it on "nerves"—when it may be their kidneys. Healthy kidneys filter poisons and excess acids from the blood. If they fail and impurities stay in the system—disturbed rest often follows. If you don't rest well get and use Dodd's Kidney Pills. Dodd's help the kidneys so that you can rest better—and feel better.

CLEANING FARM DAIRY UTENSILS

From the dairy commissioner D. H. McCallum, comes word that cleaning of farm dairy utensils is usually the greatest single factor affecting the keeping quality of milk and cream. It may be greater than all other combined. To keep farm dairy utensils in the most satisfactory condition they must be free from rust, folds, dents and open seams, the presence of which makes cleaning and sterilizing impossible.

To clean and sterilize utensils the milk should be thoroughly rinsed out of the utensil with lukewarm (not hot) water immediately after use. The utensil should be scrubbed with a clean brush (not a cloth) in a tank of hotwater containing a dairy washing powder. Any common brand of washing powder containing a wetting agent may be used by following the directions on the package. Most dairy plants as well as dairy supply houses, can supply such washing powders in convenient packages. The utensil should then be rinsed thoroughly in clean hot water.

Sterilization completes the process and is absolutely necessary to destroy harmful bacteria.
